

ABT Sportsline 2012 – Press release CW38 **A sure winner – more ABT Power for the A1 quattro**

Look at this: 1,390 kg light, plus a 2 litre turbo engine of 256 hp (188 kW) – the Audi A1 quattro is definitely one of its class's top dogs. And for **ABT Sportsline** it is an ideal basis for an exceptional car, as **Hans-Jürgen Abt** emphasises: "A dynamic engine, an intelligent 4WD and a low weight – our **A1 quattro** is a real racer." For the managing director of the globally largest tuner of cars produced by the Volkswagen Group, this "little devil" is pure energy, provides a lot of fun and with **ABT POWER** becomes "a racing car for the road".

Its 307 hp or 226 kW are quite something and its permanent and balanced quattro drive lets this advantage actually find expression on the road. "That's why I often drive that car myself", says **Hans-Jürgen Abt**. After all, **ABT Sportsline** runs extensive tests not only on the road, but also on race tracks and on the test bench so that the customer can enjoy this car all its life and in full. And the performance of the **ABT A1 quattro** has also been uprated by using all the experiences made on race tracks worldwide. Always remember: when you read **ABT**, expect racing competence...

For the **A1 quattro** this not only means a torque of 400 Nm at 2,500 to 5,000 rpms (standard version: 350 Nm), but also an acceleration from zero to 100 km/h in 5.4 seconds, three tenth of a second faster than the serial version. The power plus and the additionally improved results do not have an impact upon consumption and exhaust emissions, by the way. And in every day situations this aggressive compact athlete is nothing but gentle and well-mannered, says **Hans-Jürgen Abt**: "If needed, the **A1 quattro** reacts immediately if you hit the pedal to the metal and your body won't lack adrenaline But it is also easy to drive through narrow inner city streets." Once unleashed, this combination of **ABT POWER** and quattro drive is a sure winner!
