

ABT Sportsline 2016 – Press release CW45 **ABT S3 – a convenient compact sports car with up to 400 hp**

The world is colourful and diverse, and that is what modern mobility must reflect. “Most people don’t want a piece of sports equipment only but a fully enjoyable roadworthy car too, capable of doing anything it needs to do,” says **Hans-Jürgen Abt**, CEO of the leading enhancer of cars produced by the Volkswagen Group, about today’s customers’ expectations. **ABT Sportsline’s** result of this philosophy is based upon the latest **Audi S3** and is a car that meets these expectations: it is a compact inner-city car, a comfortable travel car and a dynamic sports car, all in one. The dependable, elegant and useful limo, available also as a chic convertible and a convenient Sportback, has a lot of power to offer: thanks to customised **ABT POWER** and the **ABT sport-type catalytic converter**, the new **Audi S3** is available in two versions: the first, the 2.0 turbo rated 400 hp/294 kW (production car: 310 hp/228 kW) and 500 Nm (production car: 400 Nm), is on top of all situations, which also applies to the smaller version, with 370 hp (272 kW) and 480 Nm.

The **ABT exhaust system** does not only sound good; the striking stainless steel system is also part of the **ABT** concept. That the four black chrome-plated tailpipes also look assertive and elegant goes without saying. Fittingly, **ABT** also provides fender inserts and a large number of sport-type wheels. The weight-reduced alloy wheels are available in various sizes and designs. Be it **ER-C**, **DR**, **FR** or **CR**, 18, 19 or 20”, the wheels will always fit the **ABT S3’s** design and power. Which wheel you choose is up to you, of course, but you will always get them also in combination with Dunlop or Continental high-performance tires. This car from Bavaria is elegant, safe and sporty – anywhere! For bended roads, for example, there is also **ABT anti-rollbars** for the front and rear axle to optimise this sporty limo’s handling.
